# CHILDLINE Child Protection Policy

## Foreword

### Introduction

CHILDLINE 1098 is a 24X7 toll free emergency service for children in need of care and protection. Any child/concerned adult on behalf of the child can dial 1098 to avail of emergency assistance. The service spans 26 states and union territories, 83 cities, 200 partner organizations directly involved in service delivery, and logs in 2 million calls a year. CHILDLINE is a civil-society-government partnership under the aegis of the Ministry of Women and Child Development (MWCD), Government of India. CHILDLINE India Foundation (CIF) is the umbrella organization for the CHILDLINE 1098 service in India.

The CHILDLINE 1098 service has been recognized as a critical child protection mechanism in the country. It receives special mention in the Juvenile Justice (Care and protection) Act, 2000. CHILDLINE 1098 has been included as an integral component in a continuum of services of the child protection system in India, in the Integrated Child Protection Scheme (ICPS), launched in 2009.

CHILDLINE adopts a rights based approach to its intervention taking from principles enshrined in the Constitution of India and United Nations Convention on the Rights of the Child (UNCRC). CHILDLINE intervention is multi-pronged. It works at three levels,

- the primary micro level: reaching the child through the CHILDLINE 1098 service
- the middle level: influencing and orienting allied systems and civil society for the creation of child friendly services;
- the macro level: advocacy and perspective building with policy makers for the creation of child friendly policy and program.

CHILDLINE advocates widely for child protection. It recognizes that children are more vulnerable than adults to the circumstances under which they live and are hence, more affected by the actions or inactions by government and society. CHILDLINE recognizes this and therefore realizes that it is imperative for all stakeholders of CHILDLINE (partner organisations, employees, associates, trustees, vendors, and contractors, referral organisations) to practice the highest standards of child protection.

CHILDLINE intervention with children include face to face counseling, restoration of children to their homes, referral to other organisations for shelter, education, vocational training, accessing health care services etc. In order for CHILDLINE to achieve its objectives it is dependent on a complex web of relationships that involve NGOs, government, donors, volunteers, communities, families, vendors, contractors, suppliers, and the public. CHILDLINE's success is dependent on the honesty, integrity and

commitment of all its stakeholders. Therefore, to minimize child protection risk and ensure that children are protected at all times, CHILDLINE introduces a child protection policy with clearly articulated code of conduct, basic minimum standards, reporting mechanism and operational guidelines

### Definition of Child

“*Child*” includes all the persons of age from the 0 to 18 years.

However, the issue of foeticide implicitly recognizes the right to life of an unborn child. Similarly, a child who is mentally challenged remains a child even after crossing the 18 years of age. The definition of child is therefore flexible and is not restricted to legally drawn age of 18 years.

### Definition of Child Protection

Child Protection is about protecting children from or against any perceived or real danger/ risk to their life, their personhood and childhood. It is about reducing their vulnerability to any kind of harm and in harmful situations. It is also about protecting children against social, psychological and emotional insecurity and distress. It must ensure that no child falls out of the social security and safety net and those who do, receive necessary care and protection to be brought back into the safety net.

Child Protection refers to protection from violence, exploitation, abuse and neglect. It is integrally linked to every other right of the child. Every child has a right to protection. This not only includes children who are in difficult circumstances and those who have suffered violence, abuse and exploitation but also those who are not in any of these

adverse situations and yet need to be protected in order to ensure that they remain within the social security and protective net.

## **Definition of child abuse**

### **General Definition**

Child abuse or maltreatment constitutes all forms of physical and/or emotional ill-treatment, sexual abuse, neglect or negligent treatment or commercial or other exploitation, resulting in actual or potential harm to the child's health, survival, development or dignity in the context of a relationship of responsibility, trust or power.

### **Physical abuse**

Physical abuse of a child is that which results in actual or potential physical harm from an interaction or lack of an interaction, which is reasonably within the control of a parent or person in a position of responsibility, power or trust. There may be a single or repeated incidents.

### **Emotional abuse**

Emotional abuse includes the failure to provide a developmentally appropriate, supportive environment, including the availability of a primary attachment figure, so that the child can develop a stable and full range of emotional and social competencies commensurate with her or his personal potentials and in the context of the society in which the child dwells. There may also be acts towards the child that cause or have a high probability of causing harm to the child's health or physical, mental, spiritual, moral or social development. These acts must be reasonably within the control of the parent or person in a relationship of responsibility, trust or power. Acts include restriction of movement, patterns of belittling, denigrating, scapegoating, threatening, scaring, discriminating, ridiculing or other non-physical forms of hostile or rejecting treatment.

### **Neglect and negligent treatment**

Neglect is the failure to provide for the development of the child in all spheres: health, education, emotional development, nutrition, shelter, and safe living conditions, in the context of resources reasonably available to the family or caretakers and causes or has a high probability of causing harm to the child's health or physical, mental, spiritual, moral or social development. This includes the failure to properly supervise and protect children from harm as much as is feasible.

## Sexual Abuse

Child sexual abuse is the involvement of a child in sexual activity that he or she does not fully comprehend, is unable to give informed consent to, or for which the child is not developmentally prepared and cannot give consent, or that violate the laws or social taboos of society. Child sexual abuse is evidenced by this activity between a child and an adult or another child who by age or development is in a relationship of responsibility, trust or power, the activity being intended to gratify or satisfy the needs of the other person. This may include but is not limited to:
